Revision Log

Date	Description of update
3/4/26	New release guide.
5/5/26	• Section 2, added 4 new bullet points, and hyperlinks page 7 • Token Data Tags (EDF) Table format color update, page 9 • Added section 2.5, pages 13-14 • Added section 2.6, pages 15-18 • Added section 2.7, pages 16-18 • Added section 2.8, page 19 • Updated Documentation table, page 20

1. Overview

1.1 NYCE Fall 2026 Release Guide (“Guide”)

This document describes new and/or enhanced NYCE® Network transaction processing, products, and services included in the Fall 2026 Release. This Guide may also identify additional changes for implementation due prior to the Fall 2026 Release. Additionally advance notice on other items, products and services may be provided in the guide. Capitalized terms used within the Guide and not otherwise defined within the Guide have the meaning set forth in the *NYCE Network Operating Rules* (“Rules”). If you have questions, please contact your NYCE Network client support team at nyce.client.services@fisglobal.com.

1.2 Document Intention and Compliance

The *NYCE Fall 2026 Release Guide* provides a high-level overview of changes included in the upcoming bi-annual release.

The Guide provides business-level information only. Any technical information referenced here will be detailed in the *NYCE ISO 8583 Interface Specifications* which apply to each NYCE Processor in accordance with the Processor’s interface functionality (acquirer or issuer, ATM, POS, eCommerce, On-Demand). Any changes to standard data element (DE) requirements are noted in the release sections of the Guide. Any future changes to the information included in the Guide will be detailed and published as an update.

Compliance with the NYCE Fall 2026 Release applies to all impacted Direct Processors and impacted Participants connected to NYCE through each Direct Processor. The ability to support the individual components of the release may vary based on the nature of each organization’s line of business. The sections below provide details for each NYCE Fall 2026 Release item including client impacts and support requirements at both the Processor and Participant levels.

Participants, Sponsors, and Processors are responsible for reviewing all available content and understanding the impact to their operations.

1.3 Important Dates Overview

Communications Timeline	
April 2026 – October 2026	Fall 2026 Release Business and Technical Updates
July 15, 2026	Direct Processor Acknowledgement Form Due
August 2026	Fall 2026 Release Certification Open
October 15, 2026	Fall 2026 Release Implementation – changes are effective on this date unless otherwise noted in this Guide

1.4 Network Update Bulletins

Network Update Release Bulletins serve as formal notification for a specific bi-annual release that has been published and/or updated. Visit the NYCE InfoManager Portal to retrieve the latest updates.

1.5 Certification and Production Requirements

Compliance with the *NYCE Fall 2026 Release* is mandatory for all impacted Direct Processors and participants connected through each Direct Processor. Processors that do not complete the required certification will be subject to financial penalties for non-compliance, as outlined in the *NYCE Network Operating Rules*. The certification process will encompass both new functionality and regression testing.

Each section provides certification and production requirements to assist Processors in identifying which sections may impact their organization and their Participants. Release Impact Tables throughout the Guide reference the definitions and release type requirements identified below in Sections 1.5.1 and 1.5.2.

To open a project and certify the NYCE Fall 2026 Release, please contact your NYCE Network client support team at nyce.client.services@fisglobal.com. Standard certification fees will apply.

1.5.1 Release Impact Table Definitions

ATM Terminal Participant – A Sponsored Participant or a financial institution that owns, controls, or deploys ATM Terminals.

Certification – Identifies the Processor’s obligation to certify for the new or updated requirements for transaction processing, products, and services for the upcoming NYCE release.

Direct ATM Terminal Processor (Acquirer) – Organization authorized by NYCE to participate in the Network, and to process ATM transactions for itself and/or one or more ATM Terminal Participants.

Direct eCommerce Processor (Acquirer) – Organization authorized by NYCE to participate in the Network, and to process eCommerce transactions for itself and/or one or more eCommerce Merchants.

Direct Issuer Processor (Issuer) – Organization authorized by NYCE to participate in the Network, and to process transactions for itself and/or one or more issuing Participants.

Direct On-Demand Processor (Acquirer) – Organization authorized by NYCE to participate in the Network, and to process On-Demand transactions for itself and/or one or more On-Demand Payment Merchants (bill payment, P2P, etc.).

Direct POS Processor (Acquirer) – Organization authorized by NYCE to participate in the Network, and to process POS transactions for itself and/or one or more POS Merchants.

eCommerce Merchant – Any Merchant that conducts all or part of its business through an eCommerce Merchant Website and is approved by NYCE to acquire eCommerce Transactions.

Issuing Participant – A depository financial institution, or other entity authorized by NYCE to participate in the Network as an Issuing Participant and issues Cards.

On-Demand Merchant – A Bill Payment Merchant, a Funding Services Provider, or a financial institution Participant or Sponsored Participant that does not otherwise meet the requirements of a Bill Payment Merchant but is NYCE approved by NYCE to process On-Demand Payment Transactions.

POS Merchant – Any Sponsored Participant that is principally engaged in the business of selling, leasing, or renting goods or services, whether the business is a wholesale or retail business and whether the goods or services are for business, agricultural, personal, family, or household purposes.

Production – Specifies the requirement for a Processor or Participant to support the new or updated requirements for transaction processing, products, and services for the upcoming NYCE release.

Software Provider – Any entity that is engaged in the business of selling, licensing, or provisioning software designed to allow users to interface to NYCE via a direct or indirect interface to the Switch.

1.5.2 Release Item Impact Table Type

The Release Item Impact Table indicates whether a particular requirement is required, optional, conditional, informational, or not applicable and whether certification is also required, as described below:

- **Required (R)** –Required change or functionality; all impacted Processors and Participants must support.
- **Certification (T)** –Certification is required.
- **Conditional (C)** – May be required under certain conditions.
- **Optional (O)** - Not a required change; Processor or Participant can optionally certify or support in production.
- **Informational (I)** – Information only for the Processor or Participant.
- **Not Applicable (N/A)** – Processor or Participant is not required to certify or support change in production.

2. NYCE Fall 2026 Release Items

- [Eliminate Late Adjustment Exception Type](#)
- [Enhanced Data File \(EDF\) Additional Token Data Support](#)
- [Expand Partial Approval Support to Bill Payment Transaction](#)
- [Support for Illinois Interchange Fee Prohibition Act](#)
- [Chip Card Data Tag Update, DE 055](#)
- [Card Verification \(CV\) Clarification, DE 123](#)
- [TES Enhancements for Multiple Completion Support, effective Aug. 4, 2026](#)
- [Supporting Document File Size Reduction for Exceptions](#)

2.1 Eliminate Late Adjustment Exception Type

Effective **October 15, 2026**, NYCE will retire the Acquirer Late Adjustment exception type and extend the Acquirer Adjustment exception type (AD1) timeframe to 1–45 days. As part of this change, exception type codes AD2 and AD2R will be retired.

No new exception reason codes will be introduced. All existing NYCE Exception Item Processing Policies that previously applied to Late Adjustment exceptions will apply to Adjustment exceptions going forward.

2.1.1 Eliminate Late Adjustment Exception Type Impact Table

Eliminate Late Adjustment Exception Type Fall 2026		Certification	Production
Software Providers		N/A	N/A
Processors	POS Processor	N/A	Required
	eCommerce Processor	N/A	Required
	On-Demand Processor	N/A	Required
	ATM Terminal Processor	N/A	Required
	Issuer Processor	N/A	Required
Participants	POS Merchant	N/A	N/A
	eCommerce Merchant	N/A	N/A
	On-Demand Payment Merchant	N/A	N/A
	ATM Terminal Participant	N/A	N/A
	Issuer Participant	N/A	N/A

2.1.2 Requirements for Acquirer Processors

All Acquirer Processors are required to submit the existing Adjustment exception type (AD1) for all adjustments submitted within 1–45 days of the original transaction date, in accordance with the *NYCE Exception Item Processing Policies*.

2.1.3 Requirements for Issuer Processors

All Issuer Processors are required to accept the existing Adjustment exception type (AD1) for all adjustments received within 1–45 days of the original transaction date, in accordance with the *NYCE Exception Item Processing Policies*.

2.2 Enhanced Data File (EDF) Additional Token Data Support

Effective **October 15, 2026**, the Enhanced Data File (EDF) will be updated to include new Token Data tags within Field 50 (Extended Data). Token Data tags will be populated in the EDF record for transactions submitted using a tokenized PAN.

Important:

- If you receive the basic enhanced data file, field 50, Extended Data is not present.
- If you receive the extended enhanced data file, field 50, Extended Data is 165 characters long.
- If you receive the full enhanced data file, field 50, Extended Data is 315 characters long.

Extended Data formats

Field 50, Extended Data, is a tagged field. Data tags are in the following format and multiple tags may be present:

- 2 character tag ID
- 3 digit length of data that follows
- Data

Example Tag Data for two tags is as follows: CS004ccccTD018xxxxxxxxxxxxxxxxxxxx

Data tags will be present in the following priority. Tags will only be present if there is data to populate:

- TE—Exception (TES) Data
- ED—On Demand Transaction Description
- CS—Multi-Clearing Data
- TC—Transaction Condition Data
- SI—(future use)
- T2—Token Assurance Level Data
- T3—Token Requester ID
- T5—Token Vault Code
- T9—Token Type
- TP—Token Vault Provider

Data is limited to the length of the Extended Data Field.

Token Data Tags (EDF)

T2—Token Assurance Level Data (Source: Data Element 124)		
Position	Length	Content
1	2	Token assurance level, 00-99

T3—Token Requester ID (Source: Data Element 124)		
Position	Length	Content
1	11	ID assigned to the requester of the token PAN

T5—Token Vault Code (Source: Data Element 124)		
Position	Length	Content
1	1 or 2	Vault code. May be 1 or 2 character code.

T9—Token Type (Source: Data Element 124)		
Position	Length	Content
1	2	Type of token

TP—Token Vault Provider (Source: Data Element 124)		
Position	Length	Content
1	2	Token service provider ID

2.2.1 EDF Additional Token Data Support Impact Table

EDF Additional Token Data Support Fall 2026		Certification	Production
Software Providers		N/A	N/A
Processors	POS Processor	Optional	Conditional
	eCommerce Processor	Optional	Conditional
	On-Demand Processor	Optional	Conditional
	ATM Terminal Processor	Optional	Conditional
	Issuer Processor	Optional	Conditional
Participants	POS Merchant	N/A	N/A
	eCommerce Merchant	N/A	N/A
	On-Demand Payment Merchant	N/A	N/A
	ATM Terminal Participant	N/A	N/A
	Issuer Participant	N/A	N/A

2.2.2 Requirements for Acquirer Processors

All Direct Acquirer Processors that receive the extended or full EDF are required to support the additional token data tag(s) in Field 50 of the EDF in production. Certification is not required.

2.2.3 Requirements for Issuer Processors

All Direct Issuer Processors that receive the extended or full EDF are required to support the additional token data tag(s) in Field 50 of the EDF in production. Certification is not required.

2.3 Expand Partial Approval Support to Bill Payment Transactions

Effective **October 15, 2026**, NYCE will support partial approvals for Bill Payment transactions.

Acquirer Processors may elect to enable partial approval functionality for their Bill Payment terminals. When a Bill Payment terminal is enabled for partial approvals, the Acquirer Processor may indicate that the terminal will accept a partial authorization response using Data Element (DE) 063, NYCE Data, sub-element 7.

If the Issuer supports partial approvals, the partially authorized amount will be returned in DE 004, Transaction Amount, of the 0210 authorization response message. The original transaction amount will be returned in DE 054, Additional Amounts, using amount type value 91, original amount. Response code 10 indicates that the authorization is a partial approval.

2.3.1 Partial Approval Support to Bill Payment Transaction Impact Table

Partial Approval Bill Payment Transactions Fall 2026		Certification	Production
Software Providers		N/A	N/A
Processors	POS Processor	N/A	N/A
	eCommerce Processor	N/A	N/A
	On-Demand Processor	Optional	Required
	ATM Terminal Processor	N/A	N/A
	Issuer Processor	Optional	Required
Participants	POS Merchant	N/A	Optional
	eCommerce Merchant	N/A	Optional
	On-Demand Payment Merchant	N/A	Optional
	ATM Terminal Participant	N/A	Optional
	Issuer Participant	N/A	Optional

2.3.2 Requirements for Acquirer Processors

Acquirer Processors may enable partial approval functionality for Bill Payment terminals. Certification is optional.

2.3.3 Requirements for Issuer Processors

If the Issuer Processor supports partial approvals for its Issuers, the Issuer Processor must return the partially authorized amount and the original transaction amount in accordance with the *NYCE ISO 8583 Interface Specifications*. Certification is optional.

2.4 Support for Illinois Interchange Fee Prohibition Act

The Illinois Interchange Fee Prohibition Act (IFPA) was signed into law in June 2024. Subsequently, the Illinois General Assembly approved an extension to the implementation timeline, which was signed into law by Governor J. B. Pritzker. As a result, the effective date of the IFPA has been extended to July 1, 2026.

NYCE is evaluating the changes necessary to ensure compliance with the IFPA and will update this Release Guide as additional information becomes available.

2.4.1 Requirements for Acquirer Processors

NYCE is evaluating the changes necessary to ensure compliance with the IFPA and will update this Release Guide as additional information becomes available.

2.4.2 Requirements for Issuer Processors

NYCE is evaluating the changes necessary to ensure compliance with the IFPA and will update this Release Guide as additional information becomes available.

2.5 Chip Card Data Tag Update, DE 055

Data Element (DE) 055, Chip Card Data, carries EMV chip card data in a tag-length-value (TLV) format. DE 055 may include binary data and values represented as hexadecimal, numeric, or alphanumeric characters. TLV tags may be provided in any order within DE 055.

As of the **Fall 2026** effective date, **Oct. 15, 2026**, Tag 9F24 (Payment Account Reference—PAR) in DE 055 is being updated from optional to **conditional**, and acquirers **must** populate it when PAR is available from the chip card data.

Chip Card Data Tags								
Tag (Binary)	Name	Description/Comments	Format of Data	Length	Message Type			3 rd Bit Map
					0100 0200	0110 0210	0420 0421	
9F24	Payment Account Reference (PAR)	Uniquely identifies the underlying cardholder account to which a payment token is associated, as defined in the EMV Tokenization Framework.	an	29	C	C	C	

2.5.1 Chip Card Data Tag Update Impact Table

Chip Card Data Tag Update Fall 2026		Certification	Production
Software Providers		Optional	Required
Processors	POS Processor	Optional	Required
	eCommerce Processor	N/A	N/A
	On-Demand Processor	N/A	N/A
	ATM Terminal Processor	N/A	N/A
	Issuer Processor	Informational	Informational
Participants	POS Merchant	Optional	Required
	eCommerce Merchant	N/A	N/A
	On-Demand Payment Merchant	N/A	N/A
	ATM Terminal Participant	N/A	N/A
	Issuer Participant	Informational	Informational

2.5.1 Requirements for Acquirer Processors

Acquirers and Acquirer Processors are required to pass chip data Tag 9F24 (PAR) in DE 055 when available from the chip card data. Certification is optional.

2.5.2 Requirements for Issuer Processors

Informational only for Issuer Processors.

2.6 Card Verification (CV) Clarification, DE 123

DE123, Additional Cardholder ID Data, is being updated to clarify Card Verification (CV) requirements. Refer to *NYCE ISO 8583 Interface Specifications – May 2026*, for additional information.

The **CR** tag, Card Verification Response, is changing from required to **conditional** and will be included only when the acquirer sets the **CV** Data tag **Response type** to **1**. In this case, acquirers can expect the issuer to return the CR tag with the result code in the response. When the acquirer sets **Response type** to **0**, the issuer is not required to return the CR tag. When CV validation failure is present in this scenario (response type set to 0), the issuer should deny the transaction with **DE039** Response code **89**, Card Verification Value validation failed.

2.6.1 Card Verification (CV) Clarification Impact Table

Card Verification (CV) Clarification Fall 2026		Certification	Production
Software Providers		Optional	Required
Processors	POS Processor	N/A	N/A
	eCommerce Processor	Optional	Required
	On-Demand Processor	Optional	Required
	ATM Terminal Processor	N/A	N/A
	Issuer Processor	Optional	Required
Participants	POS Merchant	N/A	N/A
	eCommerce Merchant	Optional	Required
	On-Demand Payment Merchant	Optional	Required
	ATM Terminal Participant	N/A	N/A
	Issuer Participant	Optional	Required

2.6.2 Requirements for Acquirer Processors

Acquirer Processors should review CV processing requirements. The acquirer must send a **Response type** value of **1** to receive CR data (result and response code) in the response message. Otherwise, a Response type value of 0 indicates response code, DE 039, should only be expected in the response message. Certification is optional.

2.6.3 Requirements for Issuer Processors

Issuer processors should review CV processing requirements. If a **Response type** value of **0** is received, DE 039 **Response code 89** should be used for Card Verification Value validation failures. If a **Response type** value of **1** is received, **CR** data tag (DE 123) is required on the response. Certification is optional.

2.7 TES Enhancements for Multiple Completion Support

Effective **Aug. 4, 2026**, TES (Transaction Exception System), and FTI (Financial Transaction Inquiry) will support additional features to effectively manage exceptions for original multiple completion transactions.

FTI Changes

FTI Summary search results will now display the sequence and count number of purchase completions when the original completion included multi-completion indicators.

Search Results: Returned 4 Transactions in 00:00.15										
Card Number	NetDateTime LocalDateTime	TranAmt SurchAmt	TranType	Net/Local Terminal	SysTrace RetRefNbr	Acq/Isr PrcId	Acq/Isr NetId	Result	TES	FRD
2121210000123456	02/18/2026 17:14:23	\$33.33	Goods and Services	IN0000	171253	INT000	NAR	Aprvd by	✓	✗
	02/18/2026 17:12:53	\$0.00	Completion (3 of 3)	MYTERMID	604900171253	PRC021	NYC	Acquirer	✗	✗
2121210000123456	02/18/2026 17:14:15	\$33.33	Goods and Services	IN0000	171253	INT000	NAR	Aprvd by	✗	✗
	02/18/2026 17:12:53	\$0.00	Completion (2 of 3)	MYTERMID	604900171253	PRC021	NYC	Acquirer	✗	✗
2121210000123456	02/18/2026 17:14:02	\$33.33	Goods and Services	IN0000	171253	INT000	NAR	Aprvd by	✓	✗

	02/18/2026 17:12:53	\$0.00	PreAuth	MYTERMID	604900171253	PRC021	NYC	Issuer	✓	✗

FTI Detail will include the sequence and count number of a purchase completion in the Authorization Info section for multi completion transactions.

Authorization Info
 Message Type: 1240 - Financial Notification (2 of 3)
 Action Code: 000 - Approved
 Auth Life Cycle: 101 - 1 Calendar Day
 Acqr Rsn: 1383 - Notification of Multiple message not completed
 Authorized By: A - Acquirer
 Approval Code: 132801

TES Changes

TES search fields will include two additional fields to help narrow search criteria or to submit a manual multiple-completion exception. These fields display only when **Purchase Completion** is selected in the **Transaction Type** drop-down. The new fields are **required** when manually entering a chargeback in TES for an original Purchase Completion transaction.

NSM PNM TES Logoff

etRef AcctNbr

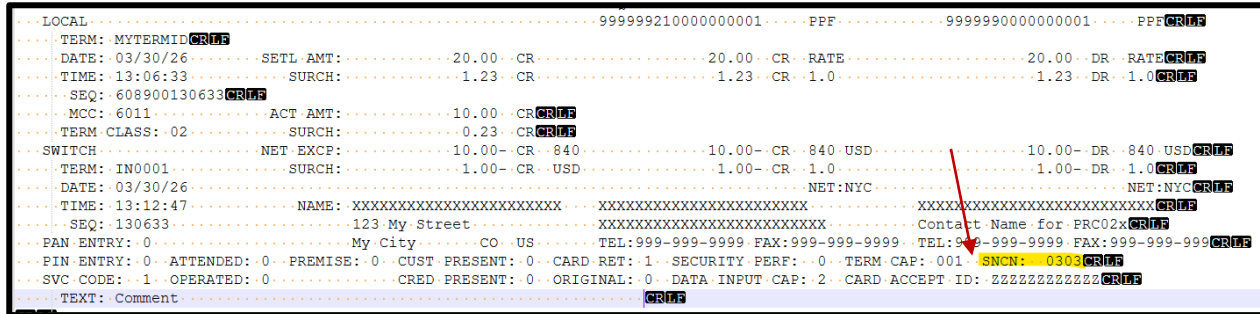

TranType **PCD - Purchase Compl from DDA** ☒ of

us **All** ExcptTrace FRDs ☒ Acqr ☒ Issr ☒

< Prev Search Next >> Add FREs ☒

Exception Activity Report Changes

The Exception Activity Report will include a new Sequence Number and Count Number (SNCN) field on all exception records. This field is for the multi-clear sequence and count number information, for example 0303 means this purchase completion is the third of three total purchase completion transactions. The SNCN field label will be displayed even if no value is populated.

New TES Error Codes

TES will support new error codes that may be returned when a chargeback is manually entered for a Purchase Completion transaction.

Error Number	Error Description
TES150	Both the Multiple Completion Sequence and Count must be specified if present
TES151	The Multiple Completion Count is invalid or out of range
TES152	The Multiple Completion Sequence is invalid or out of range
TES153	The Multiple Completion Sequence cannot be greater than the Count
TES154*	Add not allowed; multiple completions found in history

*Specific to chargebacks submitted through TES Batch on an original purchase completion that is associated with a multiple completion set. This must be entered through the TES website.

2.7.1 TES Enhancements for Multiple Completion Support Impact Support

TES Enhancements for Multiple Completion Support Fall 2026		Certification	Production
Software Providers		N/A	N/A
Processors	POS Processor	N/A	Required
	eCommerce Processor	N/A	Required
	On-Demand Processor	N/A	Required
	ATM Terminal Processor	N/A	Required
	Issuer Processor	N/A	Required
Participants	POS Merchant	N/A	N/A
	eCommerce Merchant	N/A	N/A
	On-Demand Payment Merchant	N/A	N/A
	ATM Terminal Participant	N/A	N/A
	Issuer Participant	N/A	N/A

2.7.2 Requirements for Acquirer Processors

Acquirer Processors should be prepared to receive an Exception Activity Report with the new SNCN field.

2.7.3 Requirements for Issuer Processors

Issuer Processors should update their teams on the following: (1) the FTI website enhancements used to locate original completion transactions and (2) the TES website enhancements used to submit manual chargebacks for an original Purchase Completion transaction. Additionally, Issuer Processors must be prepared to receive the Exception Activity Report containing the new SNCN field.

2.8 Supporting Document File Size Reduction for Exceptions

Effective **Oct. 15, 2026**, NYCE will reduce the **maximum size** of supporting documents submitted with exceptions through TES from 25 MB to **5 MB**. This change applies to TES, TES Batch, and the TES API. Supporting documents are currently required only for Representments but may be included with any exception type. Supporting documents submitted before October 15 may be larger than 5 MB until those documents purge from the system.

2.8.1 Supporting Document File Size Reduction for Exceptions Impact Table

Supporting Document File Size Reduction for Exceptions Fall 2026		Certification	Production
Software Providers		N/A	N/A
Processors	POS Processor	N/A	Required
	eCommerce Processor	N/A	Required
	On-Demand Processor	N/A	Required
	ATM Terminal Processor	N/A	Required
	Issuer Processor	N/A	Required
Participants	POS Merchant	N/A	N/A
	eCommerce Merchant	N/A	N/A
	On-Demand Payment Merchant	N/A	N/A
	ATM Terminal Participant	N/A	N/A
	Issuer Participant	N/A	N/A

2.8.2 Requirements for Acquirer Processors

All Acquirer Processors submitting representments **must** ensure supporting documents are under **5 MB**.

2.8.3 Requirements for Issuer Processors

All Issuer Processors submitting supporting documents with any exceptions **must** ensure file size is under **5 MB**.

3. Products and Services

No updates for Fall 2026

4. Advanced Notification

No updates for Fall 2026
