Technical Skills

Languages and Data Bases: Python, SQL/MySQL, PostgreSql
Visualization Tools: Aera Cloud Dashboard, Power BI
Other Skills: Advance Excel, Business Analysis, Data Analysis, Data Integration, Microsoft SSIS

Experience

Ernst & Young LLP.

(I) **Associate Consultant – Data Analyst |** Client: PMI (Philip Morris International) **(Supply Chain Domain)** (Feb2025-Present)

- Supporting global **supply chain analytics** and automation initiatives for PMI through the **Aera Decision Cloud platform**, which integrates with SAP and other enterprise systems to enable real-time, scalable decision-making.
- Performing end-to-end **ETL processes**: sourcing data from SAP into Aera via scheduled jobs, **transforming and analyzing** it for supply chain use cases, and **visualizing** insights through custom **dashboards and reports** using **Java script**.
- **Designing and optimizing** complex **SQL queries** to support real-time **supply chain** visibility, forecasting, and planning workflows.
- Developing and customizing Aera Cognitive Skill Models, including both UI behavior and backend logic, to automate and enhance operational decisions across inventory management, logistics, and demand planning.
- Collaborating with cross-functional teams to **gather business requirements** and implement scalable analytics solutions for inventory forecasting and logistics performance.
- Executing **data validation** and quality assurance checks to ensure accuracy and consistency across **ETL pipelines and dashboard outputs.**
- Utilizing **Python remote functions** to perform automated data loading into workspaces via **WinSCP**, **executing ETL processes**, and loading cleansed data back to the source for further processing.
- Developed interactive **Power BI dashboards** to monitor sales performance and market share across multiple geographical regions.
- Utilized **DAX (Data Analysis Expressions)** to create measures, **KPIs**, and calculations for monthly sales analysis and year-over-year (YoY) performance comparisons.
- Integrated data from Excel files and multiple **databases**, **processing** and **analyzing** over **300,000 records** for consolidated reporting.
- Analyzed historical sales data across multiple years to identify trends, track regional performance, and compare business results over time.
- Designed interactive **reports and visualizations** to present sales trends, regional comparisons, and market share insights for business decision-making.
- **Reduced manual reporting effort by 25%** by automating recurring reporting processes through interactive Power BI dashboards, improving reporting efficiency and stakeholder productivity.

TATA CONSULTANCY SERVICES. **Oct 2021 – Feb 2025**

(II)**Data Analyst** (Jan 2024-Feb 2025)

- Worked as a Data Analyst for **Cigna**, a leading U.S. healthcare client, focusing on **healthcare data analytics**, **reporting**, and **validation** to support business and clinical decision-making.
- **Data Mining**: Developed SQL queries resulting in a 30% reduction in **data extraction** time from large healthcare databases. Utilized **SQL functions and joins** to perform complex **data mining** tasks, improving decision-making processes and contributing to 10% increase in operational efficiency.

- **Data Analysis**: Conducted data analysis using **SQL queries**, resulting in the identification and resolution of 95% of data discrepancies in healthcare datasets. Collaborated cross-functionally to analyze healthcare data, leading to the implementation of strategies that resulted in a 10% reduction in costs.
- **Data Validation**: Designed and executed SQL scripts for **data validation**, resulting in a 50% decrease in manual effort and a 20% increase in **data accuracy**. Developed automated data validation procedures using SQL scripts, reducing errors by 25% and enhancing data reliability in healthcare databases.
- **Data Manufacturing**: Created SQL scripts to generate synthetic test data, covering diverse scenarios and contributing to a 20% improvement in testing coverage. Collaborated with QA teams to execute SQL-based **data manufacturing** processes, leading to a 15% increase in the efficiency of testing procedures.

(III)**Data Integration Engineer** (Oct 2021- Dec 2023)

- Collaborated in an **agile environment** for an internal project. Improved **database population** efficiency by 30% by **managing data** access from **Azure** and local file locations.
- Employed **SQL** for **exploration** and **cleansing**, providing customized solutions to clients. Enhanced data entry accuracy by 25% through **JSON schema implementation**.
- Engineered an **Elasticsearch** service, resulting in a 40% improvement in product search efficiency.
- Used **Putty** and **Postman for data file execution**, achieving a 30% increase in **data accuracy**. Leveraged JSON files for **API testing**.
- Proficient in utilizing **Jenkins** for streamlined **code deployment** and adapt in preparing comprehensive release notes and documentation.
